## **DETAILED ACTION**

### ***Information Disclosure Statement***

Examine acknowledges receipt of the information disclosure statement (IDS) submitted on December 15, 2003. The submission is in compliance with the provisions of 37 CFR 1.97 and accordingly has been considered by the examiner.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1- 12 and 17-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,555,806 to Okamoto. Although the conflicting claims are not identical, they are not patentably distinct from each other because the design of the casings wherein the first surface extends in a longitudinal direction and a traverse direction and the disposition of the respective displays with respect to the surface of the present application would have been considered an obvious design modification for one of

ordinary skill in the art to make, since the exact arranging of the elements would require routine skill in the art during the initial design phase.

Claims 13-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 16 and 17 of U.S. Patent No. 6,710,326 B2 to Okamoto. Although the conflicting claims are not identical, they are not patentably distinct from each other because the design of the casings wherein the first surface extends in a longitudinal direction and a traverse direction and the disposition of the respective displays with respect to the surface of the present application would have been considered an obvious design modification for one of ordinary skill in the art to make, since the exact arranging of the elements would require routine skill in the art during the initial design phase.
